

2026 Prescription Medication Summary

This summary is for quoting purposes only

\$5/\$10/\$50/\$75/30%/30%/30% BCRX2.OR.26

Medication Type	Retail 30-day supply	Retail and Mail order 90-day supply	Specialty 30-day supply
Value	\$5	\$10	N/A
Select	\$10	\$20	N/A
Preferred	\$50	\$100	N/A
Non Preferred	\$75	\$150	N/A
Select Specialty	N/A	N/A	30%
Preferred Specialty	N/A	N/A	30%
Non Preferred Specialty	N/A	N/A	30%

Value Tier Medications include commonly prescribed medications used to treat chronic medical conditions. They are considered safe, effective and cost-effective compared to other medication options. A list of value tier medications is available on modahealth.com.

Select Tier Medications are the most cost effective options in their therapeutic category. This tier includes generic and certain brand medications, including specialty medications, that are safe, effective and cost effective.

Preferred Tier Medications are medications, including specialty preferred medications, that we have reviewed and found to be safe and effective at a better price compared to other medications in the same therapeutic class and/or category. Generic medications that have not been shown to be safer or more effective than other more cost effective generic medications are included in this tier.

In the Select and Preferred tiers, both generic and brand medications are covered. If you get a brand medication when a generic equivalent is available, you may have to pay the difference in cost between the generic and brand medication.

Nonpreferred Tier Medications are brand medications, including specialty brand medications, that we have reviewed and they do not have significant therapeutic advantage over their preferred alternative(s). These medications generally have safe and effective options available under the Value, Select and/or Preferred tiers.

Specialty Medications are often used to treat complex chronic health conditions. Specialty medications often require special handling and have a unique ordering process. Most specialty medications must be prior authorized.

Generic Medications are medications that have been found by the Food and Drug Administration (FDA) to be therapeutically equivalent to the brand option and will often save you money. Generic medications must have the same active ingredients as the brand version and be identical in strength, dosage form and the way you take them.

If a brand medication is filled by the pharmacy when a generic equivalent is available, the member may have to pay the difference in cost between the generic and brand medication. Expenses incurred due to brand substitution do not count toward the out-of-pocket maximum.

Calendar Year Medical and Prescription Medication Maximum Out of Pocket is combined (*please refer to your medical summary*)
