Dental Benefit Overview

Members have specific preventive services included in their Providence Health Medicare Advantage plan. These services are referred to as “Embedded Preventive” benefits. Members of a Providence Medicare Advantage HMO plan must see a Delta Dental Medicare Advantage network provider for embedded preventive services to be covered. Providence Medicare Advantage HMO-POS (Point of Service) offers in- and out-of-network coverage.

Additionally, Providence Health Medicare Advantage plan members can elect to enroll in either the Providence Dental Basic or Providence Dental Enhanced plan for additional supplemental dental coverage. The Basic and Enhanced plans include an annual calendar year maximum benefit amount, which varies by plan. The costs of all covered supplemental dental services cannot exceed the plan’s maximum coverage amount in a calendar year. Both the Basic and Enhanced plans allow for out-of-network benefits.

Benefit details (e.g., maximum allowance, number of procedures, frequency limits) are outlined below in the Benefit Summaries section of this document for easy reference.
