

Dental Office Update

Join us in advancing our Diversity, Equity and Inclusion (DEI) initiatives

As a company, Delta Dental of Oregon has been working for many years to forge ways that weave the pillars of Diversity, Equity and Inclusion (DEI) into everything we do.

Diversity: We value, respect and celebrate people of all backgrounds, identities, and abilities and actively seek to identify how uniqueness makes us better.

Equity: We strive to understand the underlying causes of outcome disparities and actively work toward increasing justice and fairness in our processes, procedures and systems – both within our company and within our communities.

Inclusion: We are committed to creating environments wherein every individual has an equal opportunity to belong and can be recognized for their inherent worth and dignity.

You are invited to please share your demographic information with us that goes beyond your name and service location. Your invitation offers you the opportunity to share your race, ethnicity, languages spoken, gender and gender identity.

In order to share your information in a quick and convenient way, we have created an electronic survey that is available on our provider website. The electronic survey can be found on our website under [Forms](#).

There are two survey types:

- [Provider specific survey for dentists to complete](#)- The practitioner survey is aimed at gathering information that is unique to each individual practitioner, such as race, ethnicity and gender.
- [Clinic specific survey for the office staff to complete](#)- The clinic survey is aimed at gathering information that is at the clinic level, such as ADA accessibility, languages spoken by staff, and if interpreters are available. This survey would be completed for each unique physical location of your clinic(s).

We do hope that you choose to partner with us in sharing more about yourselves with both current and potential patients. While we invite you to participate in our provider DEI survey, it is not required. However, we do encourage you to share what you are comfortable with.

See you at the Oregon Dental Conference!

Drop by our booth at the Oregon Dental Conference. Dental professional relations and ODS Community Dental will there to answer your questions and share useful information.

Meet with our Health through Oral Wellness experts for a demonstration of this comprehensive oral health risk assessment tool.

April 7-8, 2022

PreViser Update

Say farewell to Oral Health Information Suite (OHIS) version 4 and hello to PreViser's newest Clinical Suite version 5.

The screenshot shows a blue header bar with "PreViser Oral Health Information Suite (OHIS)" on the left and "[Log On]" and "Try new version: Clinical Suite v5" on the right. Below the header is the PreViser logo and a "Powered by" tag. A central white box contains the text: "This version of PreViser will be retired on March 31, 2022", a "More Info" link, "Please start using the current version today and update your bookmarks.", a "Login to Clinical Suite Now" link, and "If you need help getting started with PreViser Clinical Suite, please visit our support site". A "Continue Using Old Version" button is at the bottom right. On the left side of the white box are "Support" and "MyAccount" links.

A note from PreViser detailing changes from the Oral Health Clinical Suite version 4 to their newer Clinical Suite version 5.

Over the last year, you may have heard about our new and improved PreViser Clinical Suite 5. This latest version is the future of Oral Health Risk Assessments. Clinicians spoke and we listened, adding many new features and enhancements like:

- **Mobile compatibility:** With a new user interface that is easier to use and works well on tablets and other mobile devices.
- **Improved Patient Risk Analysis Report:** The PreViser Risk Assessment scorecard is redesigned and easier to understand. It can be printed or emailed directly to your patients in either English or Spanish.
- **Support for the latest browsers:** PreViser works best with Google Chrome, Microsoft Edge, and IOS Safari. Clinical Suite 5 is not compatible with Microsoft Internet Explorer. If you are using this browser, we recommend updating to a new browser.

What do you need to do?

Nothing! When Oral Health Information Suite 4 is phased out on **March 31st**, your bookmarks will automatically route you to the new version 5. Your username/password and PINs will all work the

same as they did before. We recommend you start using Clinical Suite 5 today so you can access the new features right away. That way, you also get used to the new look and feel even before the switch. To access Suite 5, login to OHIS version 4 and click **Login to Clinical Suite Now**

Can't wait until March 31 to use Clinical Suite 5?

Your existing bookmarks and shortcuts will automatically update on March 31st but if you want to use the latest and greatest PreViser Clinical Suite 5 now, it's easy! Watch our step by step, how to update bookmarks and shortcuts video here: [Watch here](#)

How are we doing?

We are always working to make the PreViser tools even better. If you have any questions or ideas for improvement, please let us know at help@previser.com. We love hearing from you!

Attend our upcoming Health through Oral Wellness virtual training!

This training is a great way to familiarize yourself and/or new staff on how to complete risk assessments through **PreViser**. Our helpful Service Representatives use this opportunity to provide detailed information on how to successfully integrate the program into your everyday workflow.

Thursday, April 21, 12:00 – 1:00 pm

To register simply email RSVPdpror@deltadentalor.com. In your RSVP, please note your:

- Practice name
- Attendee name(s)
- Email address (to receive the invite)

Save the date: Spring 2022 Provider Workshop

Next virtual Provider workshop will be held on **Wednesday, May 18th, 12:00 - 1:00 pm**.

(Invite with RSVP details will be forthcoming)
